

COMPRESSION RANGE

Compression Range

Enhance your performance with Veto VX Power Compression gear and give yourself every opportunity to perform at your best. Increase power and endurance during training and competition. Improve recovery speed and reduce lactic acid build up.

What are the benefits of VX Power?

Draws moisture away from the body, keeping the bodies core temperature cool
Enhances blood circulation, and helps manage lactic acid build-up.
Comfortable and flexible material.
Ergonomically designed for the perfect fit.

Compression – Long Sleeve, Short Sleeve and Sleeveless

Made from VX800 material the compression assists in providing more oxygen to the blood. This in turn strengthens the muscles in the chest, shoulders, back and arms and increases endurance.

The compression capabilities of the VX800 prevent the build up of lactic acid, thereby reducing muscle pain, swelling and soreness. The wicking properties of the VX800 means you are kept dry and comfortable. The AERO technology of the VX800 transmits the wick moisture from the skin outwards and helps regulate body temperature.

VX POWER Calf Supports

Enhance your performance with VX Power Calf Support and give yourself every opportunity to perform at your best. Increase power and endurance during training and competition. Improve recovery speed and reduce lactic acid build up. VX Power Calf Supports are ergonomically designed for the perfect fit.

COMPRESSION SHORTS

Compression Shorts

Whatever your sport VX900 shorts improve circulation in the legs increases your strength and endurance and helps control body temperature. The shorts are manufactured in six colours, Red, Yellow, Blue, Green, Black and White.

This makes them ideal for a sport such as soccer where the compression shorts need to match the colour of the shorts (FIFA RULES).

COMPRESSION LONG PANTS

LONG PANTS

The VX900 material used in the manufacture of the pants is designed to improve circulation in the legs. The VX900 helps prevent lactic acid build up and thereby increasing strength and endurance. The material also wicks perspiration to keep you dry so you can push harder and go longer.
